Blowback B*tches!

The Feminists destroyed their own domestic credibility when they abandoned the simple base logic of 'MY Body MY Choice' FOR Equity & Diversity & Support FOR Forced Vaxxination & Lock Downs.

Feminists -WOMEN- ceded their rights by ceding the rights of others ARBITRARILY.

That western cosmopolitan virtue signalling with such antics as flying the **Gay Pride Rainbow Flag over Kabul**, painting a **memorial mural for the 'American' black drug addict and criminal George Floyd**, and **stuffing women into offices in the Afghani puppet regime**: ALL rightly angered the populace subject to these indignities.

If they had more US taxpayer money to squander on their impudent scolding and forced Equity and Diversity there would have been whole new pointless and wasteful bureaucracies and corporate impositions imposed on their people. Just as it is in the boardrooms, offices, universities, etc., etc. in the USA..

Women have destroyed their own arguments for comity and equal rights by proving that they never gave a damn about equal rights.

Women only wanted the privilege to do what they wanted.

The so-called Feminists never believed their own rhetoric.

Western men who honored the decisions of women were duped and betrayed by those lying women. The disaster is one created by women who squandered their credibility and abused their positions in their hour of empowerment.
