Revealing the True State of the Nation

Three Countries on Earth Declined the COVID Vax; All Three of their Presidents are now DEAD

Posted on July 11, 2021 by State of the Nation

Hal Turner Radio Show

Sometimes, an ugly truth is staring us in the face, we need only to see it and speak it for the reality to become clear.

There are only three (3) countries on this planet whose government officials refused to accept the COVID-19 vaccine from the World Health Organization: Burundi, Tanzania, and Haiti.

The officials in those countries who declined the vax were Presidents in each of those countries.

In Burundi it was President Pierre Nkurunziza

In Tanzania, it was President John Magufuli

In Haiti, it was President Jovenel Moïse

All three of those Presidents are now DEAD.

Coincidence?

What are the odds of these three particular men, all dying in office . . . and the only thing they have in common is that they refused to accept the vaccine for their countries?

To many people, their deaths look like murder; although the one in Haiti was straight up murder, he was assassinated by men with guns.

DEPOPULATION

Many people have speculated that the entire COVID-19 was a staged, intentionally deadly attack on humanity itself.

There are people on this planet who believe that humanity itself is like a virus against the planet. They believe humanity is destroying the planet and so, they continue, humanity must be culled.

Many of those people are in positions of great power and wealth.

It is thought by a large number of people that the so-called “vaccine” for COVID-19 is the method by which these people have decided to cull humanity.

So, the theory goes, they hyped a “novel coronavirus” which is shown to have a 99.6% SURVIVAL RATE, as a reason to get a new, untested, unproven “vaccine.” The trouble is, this vaccine does not use active or even attenuated virus in it, but instead uses mRNA technology, which has never been used as a “vaccine” anywhere on the planet, ever before.

Many, many people have already DIED after getting this “vaccine” and hundreds-of-thousands are severely injured, some permanently disabled, after getting it.

If this theory about using a vaccine to cull humanity is true, would the people perpetrating it even hesitate to murder three Presidents?

And if they're willing to murder Presidents, would they even think twice about murdering YOU?

Video: CNN Doctor Says It's "Time To Start Mandating" COVID Vaccines

MSNBC says conservatives are 'cowardly' for not wanting mandatory vaccination

Published 2 days ago on 9 July, 2021
Steve Watson

CNN ran a broadcast Thursday with its own medical analyst Dr. Jon Reiner declaring that it is "time to start mandating" coronavirus vaccines for all Americans to counter people opting not to take the shots.

CNN host Erin Burnett said to Reiner “when you look at this in the broad there’s still a third of the eligible population in the United States that ha single dose.”

“Given where things are going, is it time to move on from saying please t mandating?” Burnett asked.

Comments

Reiner replied “I do think it’s time to start mandating vaccines. And I thi private industry and private organizations will do that.”

“At GW university, where I work, starting in fall, you can’t be on campus fully vaccinated,” Reiner added.

He continued, “We’re at the part of the pandemic now where the problem country is that 150 million Americans are not vaccinated. Half of that nu than 18 years of age. But let’s look at the adults. Seventy-five-million ad chosen not to get vaccinated. That choice has consequences.”

Reiner noted that the government cannot physically force vaccinations o now), but advocated making it basically impossible for those who choose it to live their lives normally.

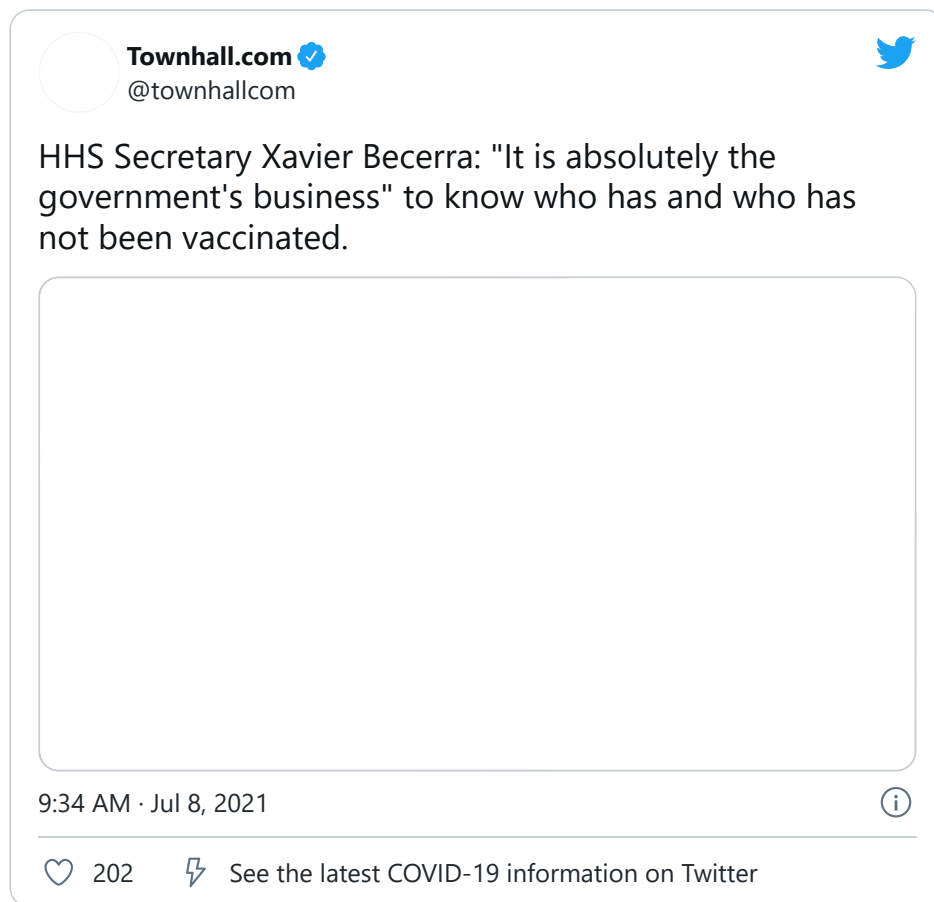

“Now, we can’t force you to take a jab in the arm,” Reiner said, adding “B many jobs, perhaps, that can prevent you from working if you decide not vaccinated. So I think we need to be more proactive, and we will see indu lead in this.”

Watch:

Earlier in the day, CNN hosted Health and Human Services Secretary Xav who said that “it is absolutely the government’s business” to know if Am

been vaccinated.

In a telling statement, Becerra said “We want to give people *the sense th the freedom to choose*, but we hope they choose to live.”

Meanwhile, over at MSNBC they took things a step further with anchor C declaring that everyone who has scepticism about the efficacy of vaccine not to take them are “cowardly.”

Hayes blamed the ‘right wing media’, proclaiming “You saw some of it th of the most conservative parts of the country turning against the vaccine of this movement are cowardly. They refuse to have the courage of their They will not come out and say they are against the vaccine. Instead, the straw-man stance saying they’re just against anyone trying to promote tl heaven forbid mandate it.”

He continued, “So on the ‘Fox & Friends’ and others on the right say the anybody try to convince them to take the shot. They don’t want it mande just want it out there. What they’re saying is you don’t want people to ge vaccine. Come out and say it, but they won’t say it. Because that means y people to die. Those are the options right now.”

Tucker Carlson, whom MSNBC's Hayes also targeted in his rant, said that the Biden administration is "no longer pro-choice" when it comes to vaccines.

"It's so obviously unnecessary that it's vindictive, and it makes you wonder what this really about?" Carlson said, adding "Medical privacy, physical autonomy, and the right to control the medicines you take. These are the pillars of medical ethics, either officially, or were. They no longer are."

"Tony Fauci has declared [these pillars of medical ethics] merely a political statement," Carlson continued.

The host further noted, "They're telling you that you'll wind up in a government database if you don't comply, and that government agents could be showing up knocking on your door. What is happening? What is this about?"

White House Press Secretary Jen Psaki, who declared earlier this week that the Biden administration is to send "strike forces" to people's homes to ensure child

vaccinated, decreed Thursday that criticism of the plan is a “disservice to country.”

The Post Millennial 
@TPostMillennial 

In regards to community-based vaccination programs, Press Secretary Psaki says "when people are critical of these tactics, it's really a disservice to the country."
