# Scanning & Transmission Electron Microscopy Reveals Graphene Oxide in CoV-19 Vaccines

Updated: 2 days ago

### 2021, February 5th, Updated September 11th, 2021

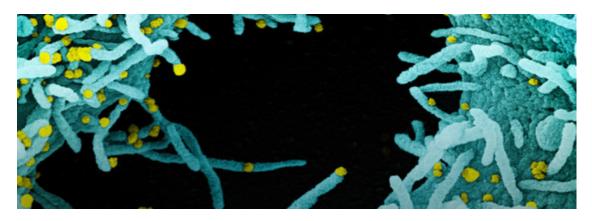

**Author**: Robert O Young CPC, MSc, DSc, PhD, Naturopathic Practitioner www.drrobertyoung.com

Phase Contrast, Dark Field, Bright Field Microscopy, Transmission and Scanning Electron Microscopy and Energy-Dispersive X-ray Spectroscopy Reveal the Ingredients in the CoV-19 Vaccines!

Case Studies Contact Scientific Posts Blog

Germs Are Born In Us and From Us as an Outfection and NOT an Infection of the Body Cells. In other words germs are symptoms of cellular and genetic disorganization and NOT the specific cause of the cellular and genetic disorganization! The GERM is NOTHING and the TERRAIN is EVERYTHING. Germs can only contribute to a state of toxic imbalance but can NEVER cause ANY specific sickness or disease! [55] - Dr. Robert O. Young

#### **Abstract**

Currently there are four major pharmaceutical companies who manufacture a SARS-CoV-2 now called SARS-CoV-19 vaccine. These manufactures and their vaccine are Pfizer-BioNTech mRNA Vaccine, the Moderna-Lonza mRNA-1273 Vaccine, the Serum Institute Oxford Astrazeneca Vaccine and the Janssen COVID -19 Vaccine, manufactured by Janssen Biotech Inc., a Janssen Pharmaceutical Company of Johnson & Johnson, a recombinant, replication-incompetent adenovirus type 26 expressing the SARS-CoV-2 spike protein. The intended purpose of these vaccines are to provide immunity from the so-called infectious novel coronavirus or SARS-CoV - 2 virus now called the SARS-CoV - 19. These four pharmaceutical companies have not provided complete FDA disclosure on their vaccine box, insert fact sheet or label for many of the major and/or minor ingredients contained within these so-called vaccines. The purpose of this research article is to identify those specific

Janssen vaccine using various scientific anatomical, physiological and functional testing for each SARS-COV-2-19 vaccine. As a human right, governed under World Law by the Nuremberg Code of 1947, the vaccine specific ingredient information is critical, required and necessary to know so that any human from any country in the World can make an informed decision whether or not to consent to the SAR-CoV-2-19 inoculation. We have conducted the scientific testing on each vaccine and have identified several ingredients or adjuvants that have not been disclosed which are contained in these four SARS-CoV - 2 -19 vaccines. Currently, these vaccines are being administered to millions of humans around the World under an Emergency Use Authorization (EUA) issued by each country without full disclosure of all ingredients and in some cases mandated by governments or employers in violation of individual human rights under the Nuremberg Code of 1947.

# Methodology and Techniques

Four "vaccines" were analyzed which are the Pfizer-BioNtech, Moderna-Lonza mRNA-1273 Vaccine, Vaxzevria by Astrazeneca, Janssen by Johnson & Johnson, using different instrumentation and protocols of preparation according to new nano particulate technological approaches. The different instrumentation includes Optical Microscopy, Bright-Field Microscopy, pHase Contrast Microscopy, Dark-Field Microscopy, UV absorbance and Fluorescence Spectroscopy, Scanning Electron Microscopy,

Blog

morphologies and contents. For the high-technology measurements and the care of the investigation, all the controls were activated and reference measurements adopted in order to obtain validated results.

### Live Blood Phase Contrast and Dark-Field Microscopy

Images of the aqueous fractions of the vaccines were subsequently obtained to visually assess the possible presence of carbon particulates or graphene.

The observations under optical microscopy revealed and abundance of transparent 2D laminar objects that show great similarity with images from literature (Xu et al, 2019), and with images obtained from rGO standard (SIGMA) (Figures 1, 2 and 3).

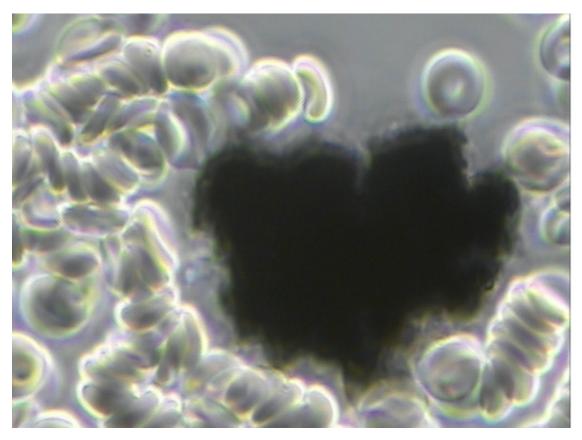

Images of big transparent sheets of variable size and shapes were obtained, showing corrugated and flat, irregular. Smaller sheets of polygonal shapes, also similar to flakes described in literature (Xu et al, 2019) can be revealed with pHase Contrast and Dark-Field microscopy (Figure 3).

All these laminar objects were widespread in the aqueous fraction of the blood (Figure 1) or vaccine sample (Figures 2 and 3) and no component described by the registered patent can be associated with these sheets.

What Are the Non-Disclosed Ingredients Contained in CoV - 19 So-Called Pfizer, Moderna, Astrazeneca and Janssen "Vaccines"?

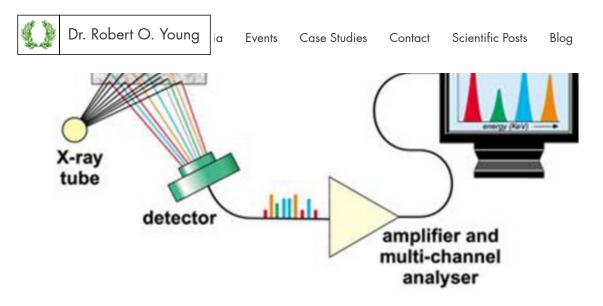

To answer this question an aqueous fraction of the Pfizer, Moderna, Astrazeneca and Janssen vaccines were taken from each vial and then viewed separately under pHase Contrast Microscopy at 100x, 600x up to 1500x magnification showing anatomical evidence of reduced Graphene Oxide (rGO) particulates which were compared to micrographs of rGO from Choucair et al, 2009 for identification and verification.[3]

## Steps of Analysis of Vaccine Aqueous Fractions

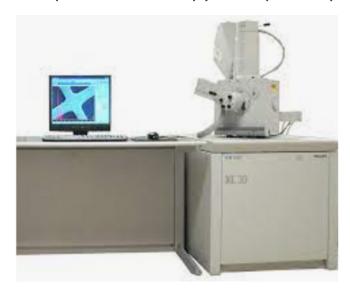

Refrigerated samples were processed under sterile conditions, using laminar flow chamber and sterilized lab ware.

### Steps for analyses were:

- 1. Dilution in 0.9% sterile physiological saline (0.45 ml + 1.2 ml)
- 2. Polarity fractionation: 1.2 ml hexane + 120 ul of RD1 sample
- 3. Extraction of hydrophilic aqueous pHase
- 4. UV absorbance and fluorescence spectroscopy scanning

- 5. Extraction and quantification of RNA in the sample
- 6. Electron and optical microscopy of aqueous pHase

Philips XL 30 Scanning Electron Microscope

rGU.

On the right of each micrograph you will view a match from known sources containing rGO for anatomical validation.

The observations under a pHase Contrast, Dark-Field, Bright-Field microscopy, Transmission and Scanning Electron microscopy of the vaccine product by Pfizer, including vaccine products of Moderna, Astrazeneca and Janssen revealed some entities that can be graphene strips as seen below in Figure 3.

In addition, the Muestra RD1, La Quinta Columna Report, June 28, 2021; Graphene Oxide Detection in Aqueous Suspension; Delgado Martin, Campra Madrid confirms our findings. https://cen.acs.org/articles/86/i4/Graphene-Ribbons.html and https://cen.acs.org/articles/86/i4/Graphene-Ribbons.html [4][73][74] [83]]

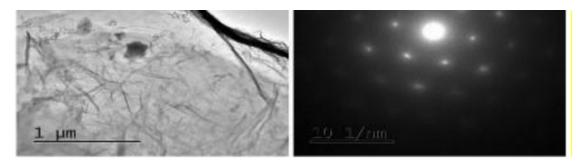

[Figure 4 shows the liposome Capsid containing rGO that Pfizer uses for its product to vehiculate the graphene oxide by attaching the Liposome capsid to specific mRNA molecules for driving the Liposome contents of fGO to specific organs, glands and tissues, namely the ovaries and testes, bone marrow, heart and brain. The image was obtained by a SEM-Cryo preparation.[83]]

For a definitive identification of graphene by TEM, it is necessary to complement the observation with the structural characterization by obtaining a characteristic electron diffraction standard sample (as the figure 'b' shown below). [4]

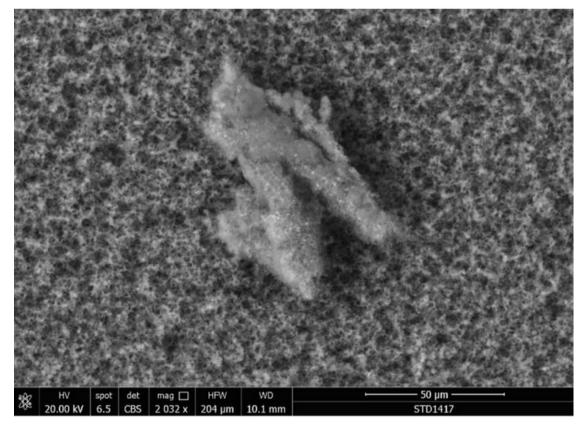

The standard sample corresponding to graphite or graphene has a hexagonal symmetry, and generally has several concentric hexagons.

[Figure 4b Reveals X ray Diffraction Pattern of the Graphene Particles. Matéria (Rio J.) 23 (1), 2018. Characterization of graphene nanosheets obtained by a modified Hummer's method. Renata Hack et al. [4][73][74][83]]

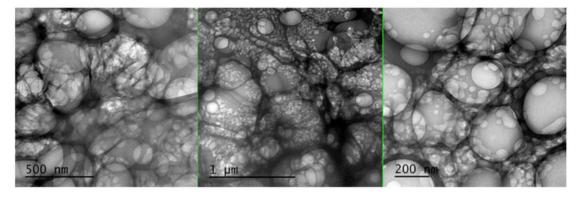

Using Transmission Electron Microscopy (TEM) we observed an intricate matrix or mesh of folded translucent flexible rGO sheets with a mixture of darker multilayer agglomerations and lighter colored of unfolded monolayers as seen in <u>Figure 5. [3][4]</u>

[Figure 5 shows a cluster of graphene nanoparticles in a Pfizer vaccine. They appear to be aggregated.[83]]

in parallel to the electron beam.[3]

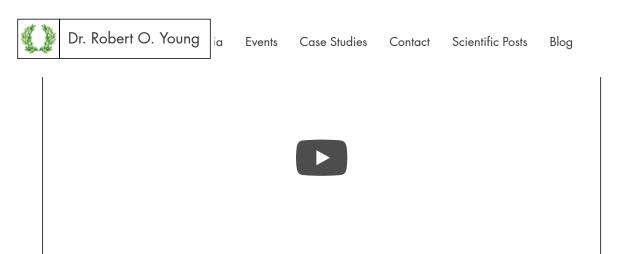

After the mesh, a high density of unidentified rounded and elliptical clear shapes appears, possibly corresponding to holes generated by mechanical forcing of the rGO mesh during treatment as seen in <u>Figure 6.[4][5]</u>

[Figure 6 shows a TEM microscopy observation where particles of reduced graphene oxide in a Pfizer "vaccine" are present. The X-ray diffractometry reveals their nature of crystalline Carbon-based nanoparticles of rGO. This evidence was intitially found by Muestra RD1, and published in the La Quinta Columna Report, June 28, 2021; Graphene Oxide Detection in Aqueous Suspension; Delgado Martin, Campra Madrid and . [4][73][74][83]]

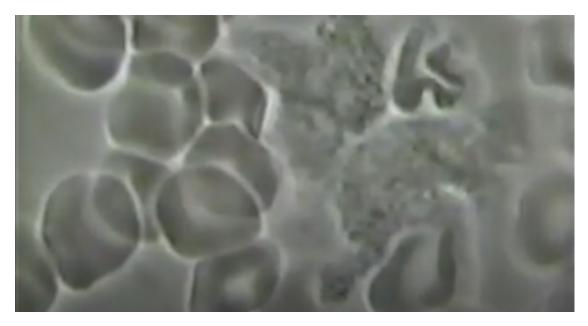

The Immune Response to Dietary, Metabolic, Environmental and Respiratory Acids Including Inoculated Organic and Inorganic Micro and Nano Particulates From So-Called "Vaccines"

The bright orange blood crystal below is solidified uric acid from the ingestion of a high protein diet from animal flesh, blood and interstitial fluids. You will note that there are several neutrophils attempting to clean-up and remove this toxic mass. This is the main purpose of white blood cells which is to manage and maintain the delicate alkaline pH balance of the body fluids.

As you watch the video above you view two neutrophils (neutrophils make up 2/3rds of the total white blood count) swimming through the blood plasma. The neutrophil from the left is moving downward to pick up a biological transformation of a Y-form yeast, like Candida albicans. Within about one minute you will see this neutrophil expel this highly toxic Y-form yeast back into the blood plasma. [[https://youtu.be/yKONi\_hDsfE Dr. Robert O. Young – Profiles in Medical Microscopy, Hikari Omni Publishing, 1987- 2021]

[Two Neutrophils Streaming Through the Blood Plasma Picking up Pathogen or Biological Transformations of Bacteria and Yeast from Cellular Degeneration of What Use to be Healthy Body Cells. Dr. Robert O. Young – Profiles in Medical Microscopy, Hikari Omni
Publishing, 1987- 2021]

This is the main function of neutrophils to pick up organic and non-organic micro and nano particulates, such as lactic acid, uric acid, bacteria, yeast, mold and even graphene oxide as seen in the micrograph below labeled GO to the right and a neutrophil labeled NET to the left.

Once again, the neutrophils are white blood cells attempting to isolate and then pick up and remove the graphene oxide, a toxic acidic pathogen which is contained in all CoV - 2 - 19 so-called vaccines as seen in the Dark Field microscopy micrograph below!

GO

[The micrograph above is showing the graphene oxide (GO) and the poisoning and destruction of the neutrophils (NET - which make up over 60 percent of all white blood cells) which are designed to pick up and eliminate foreign toxic chemical waste and biologicals. The Scientists at Karlinska Institute, the University of Manchester, Chalmers University of Technology and the Scientific Team of Dr. Robert O. Young have shown that the human immune system handles graphene oxide in the same manner as bacteria, yeast or mold.[83]]

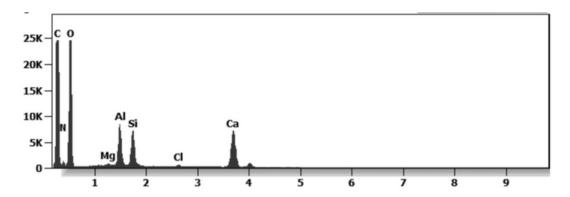

# Energy-Dispersive X-ray Spectroscopy Reveals rGO in Pfizer Vaccine[5][6][7]

The Pfizer vaccine liquid fraction was then analyzed for chemical and elemental content using Energy-dispersive X-ray spectroscopy (*EDS*) as seen in <u>Figure 6</u>. The EDS spectrum showed the presence of Carbon, Oxygen verifying the rGO elements and Sodium and Chloride since the

[Figure 7 shows a spectrum of a Pfizer "vaccine" under an ESEM microscopy coupled with an EDS x-ray microprobe (X axis = KeV, Y axis = Counts) identifying Carbon, Oxygen, Sodium and Chloride. [83]]

[Figure 7a shows he spectrum of a Pfizer "vaccine" nanoparticulates of graphene oxide, magnesium, aluminum, silicon, chloride and calcium identified under an ESEM microscope coupled with an EDS x-ray microprobe. (X axis = KeV, Y axis = Counts)[75][83]]

### The Quantification of mRNA in the Pfizer Vaccine

The quantification of RNA in the Pfizer sample was carried out with conventional protocols (Fisher).

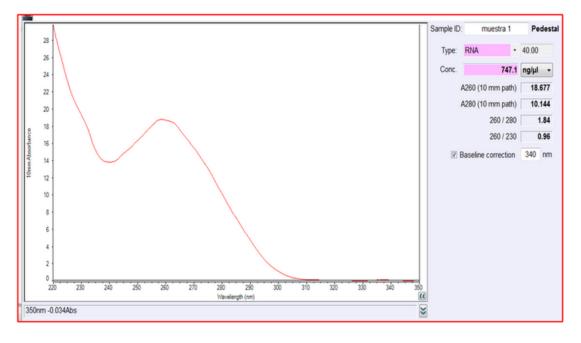

According to NanoDropTM 2000 spectrophotometer calibration check specific software (Thermofisher), the UV absorption spectrum of total aqueous fraction was correlated to 747 ng/ul of unknown absorbing substances.

could be related to the presence of RNA. The spectrum was compatible with the peak of rGO at 270nm.

According to microscopic images presented here, most of this absorbance might be due to graphene-like sheets, abundant in the fluids suspension in the sample.

The conclusions are further supported by high fluorescence from the sample with maximum at 340 nm, in accordance with peak values for rGO. It must be reminded that RNA does not show spontaneous fluorescence under UV exposure.

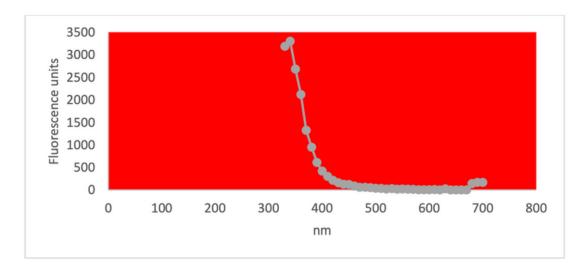

[Figure 8 - UV spectrum of aqueous fraction of Pfizer vaccine sample.[1][2][3][5][6][83]]

Ultra Violet Fluorescence Testing of the Pfizer Aqueous Fraction for Reduced Graphene Oxide (rGO)[6]

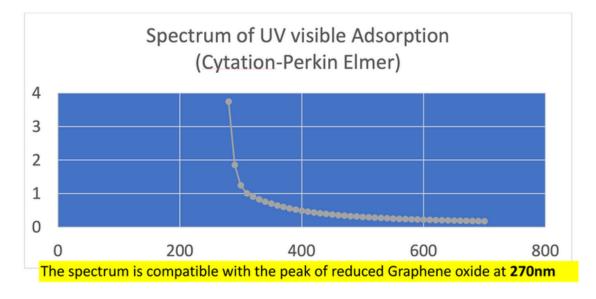

spectrophotometer (BIOTEK). UV absorbance spectrum confirmed a maximum peak at 270nm, compatible with presence of rGO particulate.

UV fluorescence maximum at 340 nm also suggests presence of significant amounts of rGO in the sample (Bano et al, 2019).

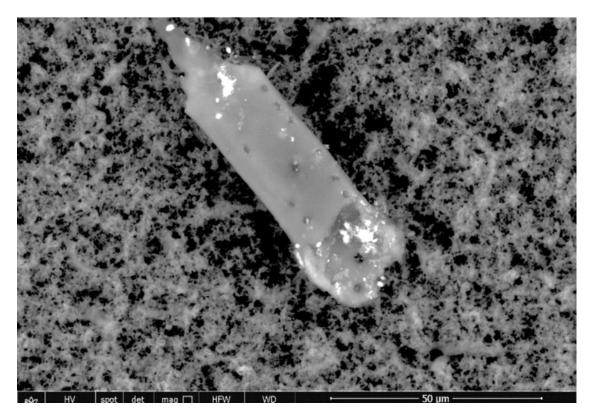

[Figure 9 - UV absorption and fluorescence spectra were obtained with Cytation 5 Cell Imaging Multi-Mode Reader Spectrophotometer (BioteK). UV absorbance spectrum confirmed a maximum peak at 270 nm, compatible with presence of rGO. UV fluorescence maximum at 340 nm also suggests presence of significant amounts of rGO in the sample (Bano et al, 2019).]

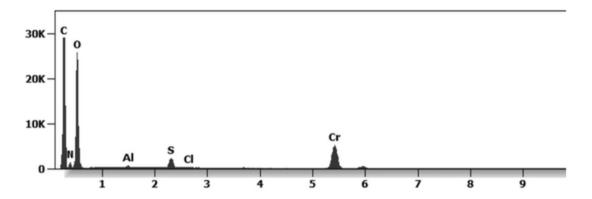

[Figure 10 - The spectroscopy UV analysis showed an adsorption due to the presence of reduced graphene oxide, which is confirmed by observation under ultraviolet visible microscopy.]

"vaccines" and analyzed under an Environmental Scanning Electron Microscope (SEM) coupled with an x-ray microprobe of an Energy Dispersive System (EDS) that reveals the particle size, composition distribution and chemical nature of the observed micro and nanoparticulates under observation.[6][7][8][83][84]

[Figure 11 shows sharp micron debris of 20 um in length identified in the Pfizer so-called "vaccine" containing Carbon, Oxygen Chromium, Sulphur, Aluminum, Chloride, Nitrogen.[75][83]]

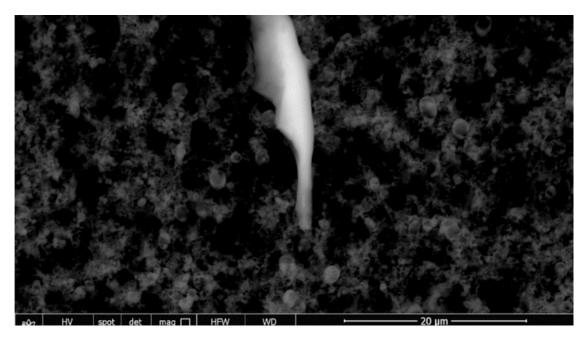

Figures 13 and 14 below shows a micrograph of different micro and nano particulates which have been identified in the Pfizer, Moderna, Astrazeneca and Janssen, so-called "vaccines" and analyzed under an Environmental Scanning Electron Microscope (SEM) coupled with an x-ray microprobe of an Energy Dispersive System (EDS) that reveals the particle size, composition distribution and chemical nature of the observed micro and nano particulates under observation.

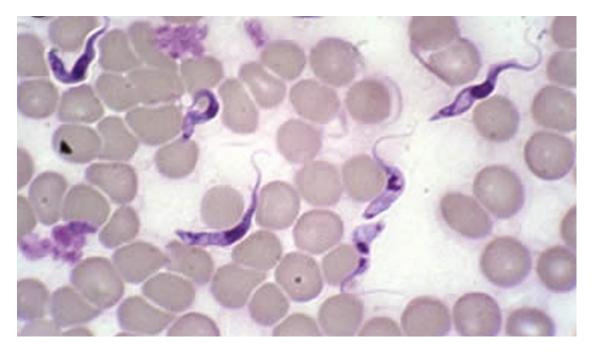

### Are There Parasites in the Pfizer "Vaccines"?

A 50 micron elongated body, as seen in <u>Figure 13</u> is a sharp mysterious presence in the Pfizer vaccine. It appears and is identified anatomically as a *Trypanosoma cruzi* parasite of which several variants are lethal and is one of many causes of acquired immune deficiency syndrome or AIDS. [Atlas of Human Parasitology, 4th Edition, Lawrence Ash and Thomas Orithel, pages 174 to 178][9][83]

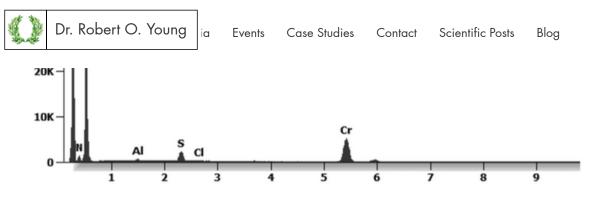

[Figure 13 shows a Trypanosoma Parasite approximately 50 microns in length found in the so-called Pfizer "vaccine". It is composed of carbon, oxygen chromium, sulphur, aluminum, chloride and nitrogen. [83]]

[Figure 13a shows a Live Blood pHase Contrast Microscopy Micrograph of Trypanosoma cruzi Parasite. [9][83]]

<u>Figure 14</u> identifies a composition of nano particulates including carbon, oxygen chromium, sulphur, aluminum, chloride and nitrogen also found in the CoV-19 "vaccines".

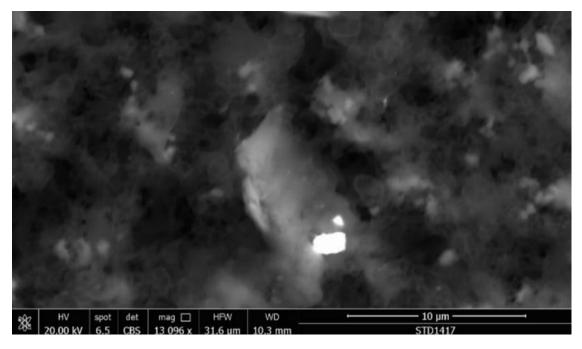

[Figure 14 Identifies a Composite of Nano particulates.[75][83]]

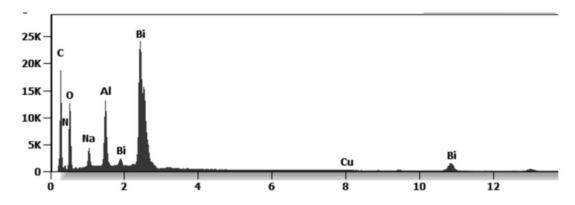

Figures 15 and 16 below show a micrograph of different micro and nano particulates which have been identified and analyzed under an Environmental Scanning Electron Microscope (SEM) coupled with an x-ray microprobe of an Energy Dispersive System (EDS) that reveals the chemical nature of the observed micro and nano particulates and their morphology.

The white 2-micron-long particulate is composed of bismuth, carbon, oxygen, aluminum, sodium, copper and nitrogen. [75][76][83]

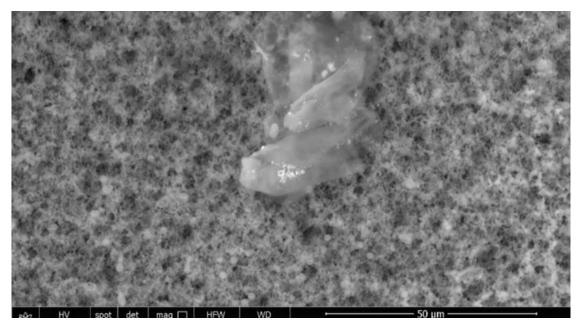

[Figure 15 shows nano and micron particulates identified in the Pfizer "vaccine". The white 2 micron long particulate is composed of bismuth, carbon, oxygen, aluminum, sodium, copper and nitrogen.[75][76][83]]

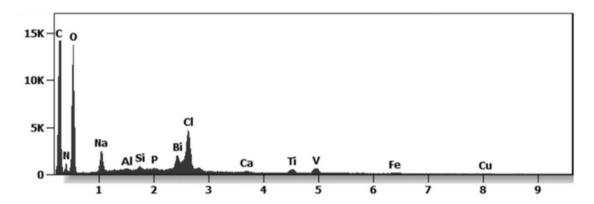

[Figure 16 shows that the white 2 micron particulate found in the so-called Pfizer 'vaccine' is composed of bismuth, carbon, oxygen, aluminum, sodium, copper and nitrogen.[75][76][84]]

Figures 17 and 18 show the identification of organic carbon, oxygen and nitrogen particulates with an aggregate of embedded nanoparticles including bismuth, titanium, vanadium, iron, copper, silicon and aluminum which were all found in the so-called Pfizer "vaccine." [75] [76][83][84]

[Figure 17 - shows an organic (Carbon-Oxygen-Nitrogen) aggregate with embedded nanoparticles of bismuth, titanium. vanadium. iron, copper, silicon, aluminum embedded in Pfizer "vaccine!" [75] [76] [83]]

[Figure 24 "The Corona Effect" and the Endogenous Creation of Exosomes Due to Chemical and Radiation Poisoning of the Vascular and the Interstitial fluids of the Interstitium. Dr. Robert O. Young, Hikari Omni Publishing, 1987 - 2021. [83]]

[Figure 25 Shows "The Corona Effect" and the the Endogenous Birth of S1 Protein Spikes Caused by Radiation and Chemical Poisoning or What I Call The "Protein Spiking Effect". Dr. Robert O. Young, Hikari Omni Publishing, 1987 - 2021. [83]]

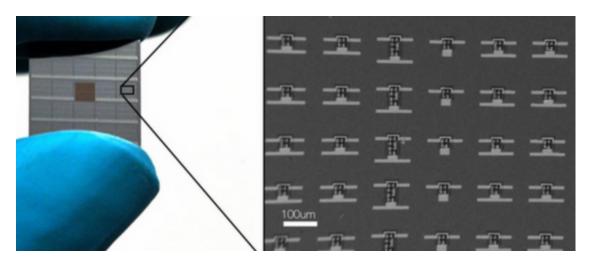

[Figure 26 This Micrograph Shows the Endogenous Birth of the "Spike Protein" as an Outfection and NOT and Infection! Dr. Robert O. Young, Hikari Omni Publishing, 1987 - 2021, [83]]

Figures 24 and 25 above show 'The CORONA EFFECT' on the red blood cells with Figure 26 showing 'The SPIKED PROTEIN EFFECT' both caused by decompensated acidosis of the interstitial and then vascular fluids from an acidic lifestyle and specifically, exposure to toxic pulsating electromagnetic fields at 2.4gHz or higher, chemical poisoning from the food and water ingested, toxic acidic air pollution, chem-trails and to top-it-all-off a nano particulate chemical laden CoV - 19 inoculation![12][82]

The Magnetic Field and Graphene Oxide

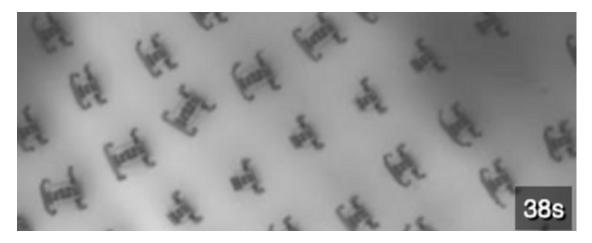

[Programmable Magnetic Graphene Oxide Nanobots[82]]

Programmable magnetic "GO" nanobots injected into the vascular and interstitial fluids of a human or animal body are found to be deposited into the connective and fatty tissues and then into the organs and glands potentially causing biological transformation of the cell membrane (crowning and protein spiking), genetic mutation, and the death of the cell as seen in the darkfield microscopy micrographs as seen above in Figures 24, 25, 26.[77][78] [82]

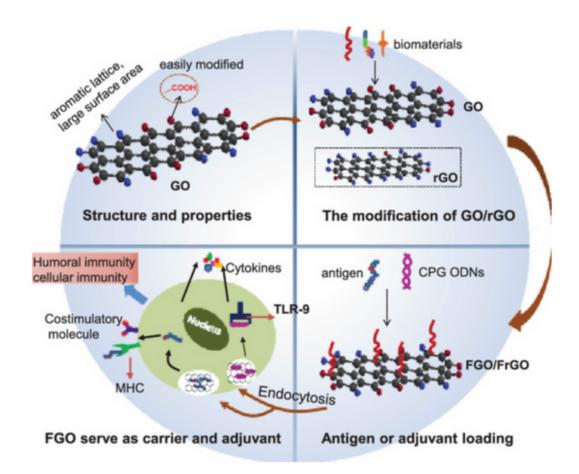

The original nanofabrication techniques were developed by Marc Miskin and colleagues at Cornell University. The research was presented at the American Physical Society in March of 2017. According to a release from *EurekAlert*, the team spent years developing a nanofabrication process that can produce a million <u>nanobots</u> from a specialized 4-inch silicon wafer in the span of weeks.[82]

[Four-Legged Graphene Oxide Nanobots - https://rumble.com/vkm84h-is-nanobot-technology-or-artificial-intelligence-viable-inside-the-human-bo.html[82]]

These micro-robots shown above feature four legs and are composed of hexagonal graphene oxide which are highly magnetic, flexible and super strong.[77][78][82]

#### Discussion

The SARS-CoVid-2-19 pandemic induced the pharmaceutical industries to develop new drugs that they called vaccines.

The mechanism of action of these new drugs as declared by the pharmaceutical industry coupled with what is reported in the vaccine products' data sheet is NOT clear for current medical savants to understand that those new drugs produced by Pfizer-BioNTech mRNA Vaccine, the Moderna-Lonza mRNA-1273 Vaccine, the Serum Institute Oxford Astrazeneca Vaccine and the Janssen COVID -19 Vaccine, manufactured by Janssen Biotech Inc., a Janssen Pharmaceutical Company of Johnson & Johnson are NOT

The name "vaccine" is likely to be an escamotage (trickery) used for bureaucratic and technocratic reasons in order to receive an urgent approval, ignoring all the normal rules necessary for new drugs, especially for those involving novel nanotechnological mechanisms which have never been developed nor experienced by humans any where, at any time in the history of World.

All these so-called "vaccines" are patented and therefore their actual content is kept secret even to the buyers, who, of course, are using taxpayers' money. So, consumers (taxpayers) have no information about what they are receiving in their bodies by inoculation. Humanity is kept in the dark as far as the nano particulate technological processes involved are concerning, on the negative effects on the cells of the body, but mostly on the possible magneticotoxic, cytotoxic and genotoxic nano-bio-interaction effect on the blood and body cells.[82]

This current research study via direct analysis on the aforementioned so-called "vaccines" by means of nano particulate technological instrumentation reveals disturbing and life-altering information concerning the truth about the actual toxic acidic contents and their effects of these so-called "vaccines".

Contact Scientific Posts Blog

The vaccines for SARS CoVid-2 or also renamed as CoVid-19 have been fast tracked from 10 years to 1 year. It is important for us all to be aware that the clinical trials of these so-called "vaccines" or "gene therapy" inoculations do not finish until 2023!!

The Pfizer, Moderna, Astrazeneca and Janssen drugs are NOT "vaccines" but complexed Graphene Oxide nano particulate aggregates of varying nano elements attached to genetically modified nucleic acids of mRNA from animal or vero cells and aborted human fetal cells as viewed and described above. Once again the ingredients in these so-called vaccines are highly magneticotoxic, cytotoxic and genotoxic to plant, insect, bird, animal and human cell membranes and their genetics which already has lead to serious injuries (estimated at over 500 million) and/or death (estimated at over 35 million).[17][18] through [55][73][82]

The so-called "experts" or "medical savants" are telling YOU that CoV -2 - 19 vaccines are the ONLY way to stop the spread of CoV-19... even when there is NO EVIDENCE of its

[Disseminated Intravascular Coagulation (DIC) or Pathological Blood Coagulation.[57][58]]

That YOU MUST get at LEAST two shots PLUS "boosters" to live "normal lives"...

And soon, they'll be telling YOU that YOU have no choice but to comply with ALL their MANdates even when the CDC and other Governments, Universities and Medical Institutes have admitted in writing that they have NO "GOLD STANDARD" isolation of the CoV - 2 now called CoV - 19 virus![55]

There is NO CORONA VIRUS and NEVER HAS BEEN![56]

Remember ...

### It is YOUR Body, YOUR Life and YOUR Choice!

Knowledge is power. And it's the key to understanding why the experimental CoV -19 vaccines are so dangerous — despite the corporate media's official narrative that suppresses and censors anyone who dares to speak out.

You are in control of your own health. Don't fall victim to global governments and bureaucrats that are pushing everyone to get vaccinated. Billionaire "philanthropist" Bill Gates and billionaire Big Tech activists think they know what's best for you and your family.

You must be free to decide what's right for you. Do NOT let governments and employers force you into getting "vaxxed" "for your own good".

In the words of the great French doctor and scientist, Antione BeChamp, "there is nothing so false that does NOT contain an element of truth and so it is with the germ theory." In this case the viral, vaccine and immunity theory![59]

### The Law of Change Doctrine of Pleomorphism

- Antoine BeChamp (1816-1908)
- Microzyma Theory
- Germs are born in us
- Father of Pleomorphism
- Many Forms Many Functions
- Germs are transmutations of organized healthy cells
- Germs do not cause disease
- Disease comes from within
- Germs are nothing the Terrain is everything
- Discovered Fermentation
- Contextual Scientist

To learn more about viruses, vaccines and the viral theory please read and study, A Second Thought About Viruses, Vaccines and the HIV AIDS Hypothesis. You can order this book at:

# 1. Scanning & Transmission Electron Microscopy Results Revealing Graphene Oxide in CoV-19 Vaccines - An

An absolute bombshell and major reveals on what is in the vaccines, with use of electron and other kinds of microscopy from original research by Dr. Robert Young and his team, confirming what the La Quinta Columna researchers found—toxic nanometallic content with cytotoxic and genotoxic effects as well as an identified parasite. This is major revelation: please stay tuned for a major article reporting this at ECC, meanwhile please share this video widely!

17. The Pfizer patent application approved, August 31st, 2021 is the very first patent that shows up in a list of over 18500 for the purpose of remote contact tracing of all vaccinated humans worldwide who will be or are now connected to the "internet of things" by a quantum link of pulsating microwave frequencies of 2.4 gHz or higher from cell towers and satellites directly to the graphene oxide held in the fatty tissues of all persons inoculated.[63][64][65][66] [67][82]

(12) United States Patent Ehrlich et al. 57) ABSTRAC

System and methods for anonymously selecting subjects for treatment against an infectious disease caused by a pathogen. The system comprises a plurality of electronic devices comprising instructions to generate an ID and, when in proximity of another such electronic device, one or both electronic devices transmit/receive the ID to/from the other electronic device. Then, a score is generated based on a plurality of such received IDs. Additionally, based on information received from a server, relevant treatment instructions are displayed to the subjects based on the received information and the score. The server comprises instructions for sending to the plurality of electronic devices the information to be displayed with the relevant treatment instructions, additionally the server and/or the electronic devices comprise instructions to generate a prediction of likelihood of a subject transmitting the pathogen, based on the score of the subject.

progress of graphene oxide as a potential vaccine carrier and adjuvant. Acta Biomater. 2020 Aug;112:14-28. doi: 10.1016/j.actbio.2020.06.009. Epub 2020 Jun 10. PMID: 32531395.

[67] Nano coronavirus recombinant vaccine taking graphene oxide as carrier - Patent https://patents.google.com/patent/CN112220919A/en

#### **Abstract**

The invention belongs to the field of nano materials and biomedicine, and relates to a vaccine, in particular to development of 2019-nCoV coronavirus nuclear recombinant nano vaccine. The invention also comprises a preparation method of the vaccine and application of the vaccine in animal experiments. The new corona vaccine contains graphene oxide, carnosine, CpG and new corona virus RBD; binding carnosine, CpG and neocoronavirus RBD on the backbone of graphene oxide; the CpG coding sequence is shown as SEQ ID NO 1; the novel coronavirus RBD refers to a novel coronavirus protein receptor binding region which can generate a high-titer specific antibody aiming at the RBD in a mouse body, and provides a strong support for prevention and treatment of the novel coronavirus.

[70] "Project: Soul Catcher: Secrets of Cyber and Cybernetic Warfare Revealed" Paperback – September 27, 2010. Volume 2 details the CIA's practices of interrogation and cybernetic mind control in their pursuit to weaponize neuropsychology. It covers the art of bio-communication war. Human beings are complex machines but their inner workings have been deciphered. Mind control and brainwashing have been perfected in the last 60 years. Hacking computers and hacking into individual minds are similar. The 21st century will be known as the age of spiritual machines and soulless men.

The present invention provides methods and compositions for the remote control of cell function based on the use of radiofrequency waves to excite nanoparticles targeted to specific cell types. The nanoparticles may be applied to the target cell extracellularly and/or expressed intracellularly.
